---

FORM 10-Q

---

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2011

- OR -

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission file number 001-31553

---

CME GROUP INC.  
(Exact name of registrant as specified in its charter)

---

Delaware  
(State or other jurisdiction of  
incorporation or organization)

36-4459170  
(I.R.S. Employer  
Identification Number)

20 South Wacker Drive, Chicago, Illinois  
(Address of principal executive offices)

60606  
(Zip Code)

(312) 930-1000  
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

---

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer   
Non-accelerated filer  (do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The number of shares outstanding of each of the registrant's classes of common stock as of April 20, 2011 was as follows: 67,059,323 shares of Class A common stock, \$0.01 par value; 625 shares of Class B common stock, Class B-1, \$0.01 par value; 813 shares of Class B common stock, Class B-2, \$0.01 par value; 1,287 shares of Class B common stock, Class B-3, \$0.01 par value; and 413 shares of Class B common stock, Class B-4, \$0.01 par value.

## **PART I: FINANCIAL INFORMATION**

### **Certain Terms**

All references to “options” or “options contracts” in the text of this document refer to options on futures contracts.

Unless otherwise indicated, references to CME Group Inc. (CME Group) products include references to products on one of its regulated exchanges: Chicago Mercantile Exchange Inc. (CME), Board of Trade of the City of Chicago, Inc. (CBOT), New York Mercantile Exchange, Inc. (NYMEX) and Commodity Exchange, Inc. (COMEX). Products listed on these exchanges are subject to the rules and regulations of the particular exchange and the applicable rulebook should be consulted. Unless otherwise indicated, references to NYMEX include its subsidiary, COMEX.

Further information about CME Group and its products can be found at <http://www.cmegroup.com>. Information made available on our Web site does not constitute a part of this Quarterly Report on Form 10-Q.

### **Information about Trading Volume and Average Rate per Contract**

Disclosed amounts of trading volume and average rate per contract exclude our TRAKRS, credit default swaps and interest rate swaps.

### **Trademark Information**

CME Group is a trademark of CME Group Inc. The Globe logo, CME, Chicago Mercantile Exchange, Globex and E-mini are trademarks of Chicago Mercantile Exchange Inc. CBOT and Chicago Board of Trade are trademarks of Board of Trade of the City of Chicago, Inc. NYMEX, New York Mercantile Exchange and ClearPort are trademarks of New York Mercantile Exchange, Inc. Dow Jones and Dow Jones Indexes are service marks of Dow Jones Trademark Holdings, LLC, and have been licensed to CME Index Services LLC. All other trademarks are the property of their respective owners.

### **Forward-looking Statements**

From time to time, in this Quarterly Report on Form 10-Q as well as in other written reports and verbal statements, we discuss our expectations regarding future performance. These forward-looking statements are identified by their use of terms and phrases such as “believe,” “anticipate,” “could,” “estimate,” “intend,” “may,” “plan,” “expect” and similar expressions, including references to assumptions. These forward-looking statements are based on currently available competitive, financial and economic data, current expectations, estimates, forecasts and projections about the industries in which we operate and management’s beliefs and assumptions. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or implied in any forward-looking statements. We want to caution you not to place undue reliance on any forward-looking statements. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. Among the factors that might affect our performance are:

- increasing competition by foreign and domestic entities, including increased competition from new entrants into our markets and consolidation of existing entities;
- our ability to keep pace with rapid technological developments, including our ability to complete the development, implementation and maintenance of the enhanced functionality required by our customers;
- our ability to continue introducing competitive new products and services on a timely, cost-effective basis, including through our electronic trading capabilities, and our ability to maintain the competitiveness of our existing products and services, including our ability to provide effective services to the over-the-counter market;
- our ability to adjust our fixed costs and expenses if our revenues decline;
- our ability to generate revenues from our processing services;

## Table of Contents

- our ability to maintain existing customers, develop strategic relationships and attract new customers;
- our ability to expand and offer our products in non-U.S. jurisdictions;
- changes in domestic and non-U.S. regulations;
- changes in government policy, including policies relating to common or directed clearing and changes as a result of legislation stemming from the implementation of the Dodd-Frank Act;
- the costs associated with protecting our intellectual property rights and our ability to operate our business without violating the intellectual property rights of others;
- our ability to generate revenue from our market data that may be reduced or eliminated by the growth of electronic trading, the state of the overall economy or declines in subscriptions;
- changes in our rate per contract due to shifts in the mix of the products traded, the trading venue and the mix of customers (whether the customer receives member or non-member fees or participates in one of our various incentive programs) and the impact of our tiered pricing structure;
- the ability of our financial safeguards package to adequately protect us from the credit risks of clearing members;
- the ability of our compliance and risk management methods to effectively monitor and manage our risks, including our ability to prevent errors and misconduct;
- changes in price levels and volatility in the derivatives markets and in underlying fixed income, equity, foreign exchange, interest rate and commodities markets;
- economic, political and market conditions, including the volatility of the capital and credit markets and the impact of economic conditions on the trading activity of our current and potential customers stemming from the financial crisis that began in 2008 and any other future crises;
- our ability to accommodate increases in trading volume and order transaction traffic without failure or degradation of the performance of our trading and clearing systems;
- our ability to execute our growth strategy and maintain our growth effectively;
- our ability to manage the risks and control the costs associated with our acquisition, investment and alliance strategy;
- our ability to continue to generate funds and/or manage our indebtedness to allow us to continue to invest in our business;
- industry and customer consolidation;
- decreases in trading and clearing activity;
- the imposition of a transaction tax or user fee on futures and options on futures transactions and/or repeal of the 60/40 tax treatment of such transactions;
- the unfavorable resolution of material legal proceedings; and
- the seasonality of the futures business.

For a detailed discussion of these and other factors that might affect our performance, see Item 1A. of our Annual Report on Form 10-K, filed with the Securities and Exchange Commission on February 28, 2011 and Item 1A of this Report.

**CME GROUP INC. AND SUBSIDIARIES**  
**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

**1. Basis of Presentation**

The consolidated financial statements consist of CME Group Inc. (CME Group) and its subsidiaries (collectively, the company), including Chicago Mercantile Exchange Inc. (CME), the Board of Trade of the City of Chicago, Inc. (CBOT), New York Mercantile Exchange, Inc. (NYMEX) and their respective subsidiaries (collectively, the exchange). On March 18, 2010, CBOT acquired a 90% ownership interest in CME Group Index Services LLC (Index Services), a joint venture with Dow Jones & Company (Dow Jones). The financial statements and accompanying notes presented in this report include the financial results of Index Services beginning on March 19, 2010.

The accompanying interim consolidated financial statements have been prepared by CME Group without audit. Certain notes and other information normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. In the opinion of management, the accompanying consolidated financial statements include all normal recurring adjustments considered necessary to present fairly the financial position of the company at March 31, 2011 and December 31, 2010 and the results of operations and cash flows for the periods indicated. Quarterly results are not necessarily indicative of results for any subsequent period.

The accompanying consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto in CME Group's Annual Report on Form 10-K for the year ended December 31, 2010, filed with the Securities and Exchange Commission (SEC) on February 28, 2011. Certain reclassifications have been made to the 2010 financial statements to conform to the presentation in 2011.

**2. Intangible Assets and Goodwill**

Intangible assets consisted of the following at March 31, 2011 and December 31, 2010:

<i>(in millions)</i>	March 31, 2011			December 31, 2010		
	Cost	Accumulated Amortization	Net Book Value	Cost	Accumulated Amortization	Net Book Value
<b>Amortizable Intangible Assets:</b>						
Clearing firm, market data and other customer relationships	\$3,080.7	\$ (319.5)	\$ 2,761.2	\$3,081.0	\$ (292.3)	\$ 2,788.7
Lease-related intangibles	83.2	(36.5)	46.7	83.2	(33.5)	49.7
Technology-related intellectual property	51.2	(20.4)	30.8	51.3	(17.8)	33.5
Other <sup>(1)</sup>	15.0	(12.5)	2.5	15.1	(11.8)	3.3
	3,230.1	(388.9)	2,841.2	3,230.6	(355.4)	2,875.2
Foreign currency translation adjustments	(7.6)	4.1	(3.5)	(8.7)	4.3	(4.4)
Total amortizable intangible assets	\$3,222.5	\$ (384.8)	2,837.7	\$3,221.9	\$ (351.1)	2,870.8
<b>Indefinite-Lived Intangible Assets:</b>						
Trade names			582.9			582.9
Foreign currency translation adjustments			(0.4)			(0.4)
Total intangible assets – other, net			\$ 3,420.2			\$ 3,453.3
Trading products <sup>(2)</sup>			\$17,040.5			\$17,040.5

- (1) At March 31, 2011 and December 31, 2010, other amortizable intangible assets consisted of non-compete, service and market maker agreements as well as a definite-lived trade name.
- (2) Trading products represent futures and options products acquired in our business combinations with CBOT Holdings and NYMEX Holdings. Clearing and transaction fees revenues are generated through the trading of these products. These trading products, most of which have traded for decades, require authorization from the Commodity and Futures Trading Commission (CFTC). Product authorizations from the CFTC have no term limits.

[Table of Contents](#)

Total amortization expense for intangible assets was \$33.2 million and \$30.8 million for the quarters ending March 31, 2011 and 2010, respectively. As of March 31, 2011, the future estimated amortization expense related to amortizable intangible assets is expected to be:

(in millions)

Remainder of 2011	\$ 98.6
2012	126.2
2013	120.0
2014	118.3
2015	114.4
2016	109.0
Thereafter	2,151.2

Goodwill activity consisted of the following for the quarter ended March 31, 2011 and the year ended December 31, 2010:

(in millions)

	Balance at December 31, 2010	Business Combinations	Impairment Adjustment	Other Activity <sup>(3)</sup>	Balance at March 31, 2011
CBOT Holdings	\$ 5,035.7	\$ —	\$ —	\$ —	\$ 5,035.7
NYMEX Holdings	2,462.3	—	—	(0.1)	2,462.2
Index Services	435.6	—	—	(0.5)	435.1
Other	50.0	—	—	2.4	52.4
<b>Total Goodwill</b>	<u>\$ 7,983.6</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 1.8</u>	<u>\$ 7,985.4</u>

(in millions)

	Balance at December 31, 2009	Business Combinations	Impairment Adjustment	Other Activity <sup>(3)</sup>	Balance at December 31, 2010
CBOT Holdings	\$ 5,035.7	\$ —	\$ —	\$ —	\$ 5,035.7
NYMEX Holdings	2,463.1	—	—	(0.8)	2,462.3
Index Services	—	435.6	—	—	435.6
Other	50.4	21.1	(19.8)	(1.7)	50.0
<b>Total Goodwill</b>	<u>\$ 7,549.2</u>	<u>\$ 456.7</u>	<u>\$ (19.8)</u>	<u>\$ (2.5)</u>	<u>\$ 7,983.6</u>

- (3) Other activity includes adjustments to restructuring costs and tax contingencies for NYMEX Holdings and the recognition of excess tax benefits upon exercise of stock options assumed for NYMEX Holdings. It also includes adjustments to the preliminary purchase price allocation for Index Services and foreign currency translation adjustments.

The company conducts impairment testing of goodwill and indefinite-lived intangible assets at least annually. During the second quarter of 2010, the company recorded a \$19.8 million impairment charge to reduce the carrying amount of CMA goodwill to its estimated fair value.

[Table of Contents](#)

**3. Debt**

Short-term debt consisted of the following at March 31, 2011 and December 31, 2010:

<i>(in millions)</i>	March 31, 2011	December 31, 2010
Term loan due 2011, interest equal to 3-month LIBOR plus 1.00%, reset quarterly <sup>(1)</sup>	\$ —	\$ 420.5
<b>Total short-term debt</b>	<b>\$ —</b>	<b>\$ 420.5</b>

Long-term debt consisted of the following at March 31, 2011 and December 31, 2010:

<i>(in millions)</i>	March 31, 2011	December 31, 2010
\$750.0 million fixed rate notes due August 2013, interest equal to 5.40%	\$ 748.7	\$ 748.6
\$750.0 million fixed rate notes due February 2014, interest equal to 5.75%	747.4	747.1
\$612.5 million fixed rate notes due March 2018, interest equal to 4.40% <sup>(2)</sup>	609.2	609.1
<b>Total long-term debt</b>	<b>\$ 2,105.3</b>	<b>\$ 2,104.8</b>

- (1) In September 2008, the company entered into an interest rate swap agreement that modified the variable interest obligation associated with this facility so that the interest payable effectively became fixed at a rate of 4.72% beginning with the interest accrued after October 22, 2008. This interest rate swap agreement was terminated in January 2011 when the term loan was repaid.
- (2) In February 2010, the company entered into a forward-starting interest rate swap agreement that modified the interest obligation associated with these notes so that the interest payable on the notes effectively became fixed at a rate of 4.46% at issuance on March 18, 2010.

Commercial paper notes with an aggregate par value of \$1.0 billion and maturities ranging from 1 to 33 days were issued during the first quarter of 2011. There was no commercial paper outstanding at December 31, 2010 or March 31, 2011. During the first quarter of 2011 and 2010, the weighted average balance, at par value, of commercial paper outstanding was \$124.3 million and \$230.0 million, respectively. In the first quarter of 2011, the maximum month-end balance for commercial paper was \$200.0 million in January. In the first quarter of 2010, the maximum month-end balance was \$300.0 million in February and March.

Long-term debt maturities, at par value, were as follows as of March 31, 2011:

<i>(in millions)</i>	
2012	\$ —
2013	750.0
2014	750.0
2015	—
2016	—
Thereafter	612.5

The fair values of the fixed rate notes due 2013 and 2014 were estimated using quoted market prices. The fair value of the fixed rate notes due 2018 was derived using a standard valuation model with market-based observable inputs including U.S. Treasury yields and interest rate spreads. At March 31, 2011, the fair values of the fixed rate notes by maturity date were as follows.

<i>(in millions)</i>	Fair Value
\$750.0 million fixed rate notes due August 2013	\$ 817.4
\$750.0 million fixed rate notes due February 2014	830.0
\$612.5 million fixed rate notes due March 2018	619.0

#### 4. Income Taxes

The company's effective tax rate decreased to 10.7% in the first quarter of 2011 from 39.8% in the first quarter of 2010. The effective tax rate decreased by 23.1% due to a tax benefit of \$118.1 million resulting from a change in state tax apportionment. This change resulted in a reduction in the income tax provision primarily due to a revaluation of existing deferred tax liabilities. The effective tax rate also decreased by 9.5% due to a \$48.8 million reduction in valuation allowances on unrealized capital losses previously reserved. The company began marking-to-market its investment in BM&FBOVESPA S.A. (BM&FBOVESPA) in the first quarter of 2011 which resulted in the reversal of these unrelated valuation allowances.

Also, the company reversed a valuation allowance of \$64.3 million related to its investment in BM&FBOVESPA, which increased accumulated other comprehensive income (loss). The valuation allowance was reversed because the company began marking-to-market its investment in BM&FBOVESPA in the first quarter of 2011.

#### 5. Contingencies

*Legal Matters.* In 2008, Fifth Market filed a complaint against CME Group and CME seeking a permanent injunction against CME's Globex system and enhanced damages for what the plaintiff alleges is willful infringement of two U.S. patents, in addition to costs, expenses and attorneys' fees. Discovery in the matter is ongoing and trial is set for 2012. Based on its investigation to date and advice from legal counsel, the company believes this suit is without merit and intends to defend itself vigorously against these charges.

In 2009, CME and CBOT filed a complaint against Howard Garber seeking a declaratory judgment that neither CME nor CBOT was infringing certain of Mr. Garber's patents and that one of his patents is invalid and unenforceable. In 2009, Technology Research Group LLC, the current owner of one of the patents at issue, filed counterclaims alleging that CME and CBOT infringe, induce or contribute to the infringement and willfully infringe its patent. Technology Research is seeking an injunction and damages no less than a reasonable royalty. Trial is set for June 2011. Based on its investigation to date and advice from legal counsel, the company believes this suit is without merit and intends to defend itself vigorously against these charges.

In 2009, Realtime Data LLC filed a complaint against CME Group and other exchanges alleging willful infringement of four patents which was later amended to add CBOT and NYMEX as defendants. Subsequently, two additional lawsuits have been filed each adding a claim for the infringement of an additional patent. One of these lawsuits has been consolidated with the original action and the other is under consideration for consolidation. Realtime Data is seeking a permanent injunction, enhanced damages, attorneys' fees and costs. Trial is set for 2012. Based on its investigation to date and advice from legal counsel, the company believes this suit is without merit and intends to defend itself vigorously against these charges.

The foregoing legal matters involve alleged infringements of intellectual property, which due to their nature involve potential liability that is uncertain and difficult to quantify. The company believes that the matters are without merit and intends to defend itself vigorously against the claims. Due to the early stages of the Fifth Market and Realtime Data matters, the company is unable to quantify potential damages in the unlikely event it were found to be liable at trial. In the unlikely event the company were found to be liable at trial in the Garber matter, it has estimated potential damages to be between approximately \$1.5 million and \$3.0 million.

In addition, the company is a defendant in, and has potential for, various other legal proceedings arising from its regular business activities. While the ultimate results of such proceedings against the company cannot be predicted with certainty, the company believes that the resolution of any of these matters will not have a material adverse affect on its consolidated financial position or results of operations.

*Regulatory Matters.* In the normal course of business, the company discusses matters with its regulators raised during regulatory examinations or otherwise subject to their inquiry and oversight. These matters could result in censures, fines, penalties or other sanctions. Management believes the outcome of any resulting actions will not have a material adverse affect on its consolidated financial position or results of operation. However, the company is unable to predict the outcome or the timing of the ultimate resolution of these matters, or the potential fines, penalties or injunctive or other equitable relief, if any, that may result from these matters.

*Intellectual Property Indemnifications.* Certain agreements with customers and other third parties related to accessing the CME Globex platform, the CME ClearPort platform, and/or the Clearing 21 platform; utilizing market data services; licensing CME SPAN software; and calculating indexes as a service provider and licensing indexes as the basis of financial products may contain indemnifications from intellectual property claims that may be made against them as a result of their use of the applicable products and/or services. The potential future claims relating to these indemnifications cannot be estimated and, therefore, no liability has been recorded.

## 6. Guarantees

*CME Clearing Contract Settlement.* CME marks-to-market open positions for most products at least twice a day, and requires payment from clearing firms whose positions have lost value and makes payments to clearing firms whose positions have gained value. For select product offerings within newer markets, positions are marked-to-market once daily, with the capability to mark-to-market more frequently as market conditions warrant. Under the extremely unlikely scenario of simultaneous default by every clearing firm who has open positions with unrealized losses, the maximum exposure related to CME's guarantee would be one half day of changes in fair value of all open positions, before considering CME's ability to access defaulting clearing firms' performance bond and guaranty fund balances as well as other available resources. During the first quarter of 2011, CME transferred an average of approximately \$2.7 billion a day through its clearing system for settlement from clearing firms whose positions had lost value to clearing firms whose positions had gained value. CME reduces its guarantee exposure through initial and maintenance performance bond requirements and mandatory guaranty fund contributions. The company believes that its guarantee liability is immaterial and therefore has not recorded any liability at March 31, 2011.

*Mutual Offset Agreement.* CME and Singapore Exchange Limited (SGX) have a mutual offset agreement with a current term through October 2011. The term of the agreement will automatically renew for a one-year period unless either party provides advance notice of their intent to terminate. CME can maintain collateral in the form of U.S. Treasury securities or irrevocable letters of credit. At March 31, 2011, CME was contingently liable to SGX on irrevocable letters of credit totaling \$117.0 million. Regardless of the collateral, CME guarantees all cleared transactions submitted through SGX and would initiate procedures designed to satisfy these financial obligations in the event of a default, such as the use of performance bonds and guaranty fund contributions of the defaulting clearing firm.

*Cross-Margin Agreements.* CME and The Options Clearing Corporation (OCC) have a cross-margin arrangement, whereby a common clearing firm may maintain a cross-margin account in which the clearing firm's positions in certain CME futures and options on futures contracts are combined with certain positions cleared by OCC for purposes of calculating performance bond requirements. The performance bond deposits are held jointly by CME and OCC. If a participating firm defaults, the gain or loss on the liquidation of the firm's open position and the proceeds from the liquidation of the cross-margin account would be allocated 50% each to CME and OCC.

Cross-margin agreements exist with CME and Fixed Income Clearing Corp (FICC) whereby the clearing firms' offsetting positions with CME are subject to reduced margin requirements. Clearing firms maintain separate performance bond deposits with each clearing house, but depending on the net offsetting positions between CME and FICC, each clearing house may reduce the firm's performance bond requirement. In the event of a firm default, the total liquidation net gain or loss on the firm's offsetting open positions and the proceeds from the liquidation of the performance bond collateral held by each clearing house's supporting offsetting positions would be divided evenly between CME and FICC. Additionally, if, after liquidation of all the positions and collateral of the defaulting firm at each respective clearing organization, and taking into account any cross-margining loss sharing payments, any of the participating clearing organizations has a remaining liquidating surplus, and any other participating clearing organization has a remaining liquidating deficit, any additional surplus from the liquidation would be shared with the other clearing house to the extent that it has a remaining liquidating deficit. Any remaining surplus funds would be passed to the bankruptcy trustee.

*GFX Corporation Letter of Credit.* CME guarantees a \$15.0 million standby letter of credit for GFX Corporation (GFX). The beneficiary of the letter of credit is the clearing firm that is used by GFX to execute and maintain its futures positions. Per exchange requirements, GFX is required to place performance bond deposits with its clearing firm. The letter of credit, utilized as a performance bond, would be drawn on in the event that GFX defaults in meeting requirements to its clearing firm. In the unlikely event of a payment default by GFX, if GFX's performance bond is not sufficient to cover the deficit, CME would guarantee the remaining deficit, if any.

## 7. Stock-Based Payments

Total expense for stock-based payments, including shares issued to the board of directors was \$12.9 million and \$9.9 million for the quarter ended March 31, 2011 and 2010, respectively. The total income tax benefit recognized in the consolidated statements of income for stock-based payment arrangements was \$5.1 million and \$4.0 million for the quarters ended March 31, 2011 and 2010, respectively.

In the first quarter of 2011, the company granted employees stock options totaling 4,616 shares under the CME Group Omnibus Stock Plan. The options have a ten-year term with an exercise price of \$286 per share, the closing market price on the date of grant. The fair value of these options totaled \$0.5 million, measured at the grant date using the Black-Scholes valuation model, which is recognized as compensation expense on an accelerated basis over the vesting period of four years. The Black-Scholes fair value of the option grants were calculated using the following assumptions: dividend yield of 2.0%; expected volatility of 42%; risk-free interest rate of 2.4% and an expected life of 6.3 years. The grant date weighted average fair value of options granted during the first quarter of 2011 was \$103 per share.

In the first quarter of 2011, the company granted 6,297 shares of restricted Class A common stock which generally have a vesting period of two to four years. The fair value of these grants was \$1.8 million, which is recognized as compensation expense on an accelerated basis over the vesting period.

## 8. Accumulated Other Comprehensive Income (Loss)

In December 2008, an unrealized loss of \$81.7 million, net of tax, resulting from changes in foreign currency exchange rates, was recorded in accumulated other comprehensive income (loss) upon recognizing impairment on the company's investment in BM&FBOVESPA. Prior to February 2011, this investment was recorded at cost due to restrictions on sale of the stock. The company began marking-to-market its investment in BM&FBOVESPA in February 2011 because these restrictions will lapse in February 2012, with changes in unrealized gains (losses) recorded in accumulated other comprehensive income (loss). During the first quarter the company recognized an unrealized gain on securities of \$265.0 million, net of tax, and reversed the unrealized loss of \$81.7 million, net of tax, attributable to currency translation adjustments recorded in December 2008. The market value of the company's investment in BM&FBOVESPA at March 31, 2011 was \$727.6 million.

## 9. Fair Value Measurements

The company uses a three-level classification hierarchy of fair value measurements for disclosure purposes.

- Level 1 inputs, which are considered the most reliable evidence of fair value, consist of quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 inputs consist of observable market data, other than level 1 inputs, such as quoted prices for similar assets and liabilities in active markets or inputs other than quoted prices that are directly observable.
- Level 3 inputs consist of unobservable inputs which are derived and cannot be corroborated by market data or other entity-specific inputs.

In general, the company uses quoted prices in active markets for identical assets to determine the fair value of marketable securities and equity investments. Level 1 assets generally include U.S. Treasury securities, exchange-traded mutual funds and publicly-traded equity securities. If quoted prices are not available to determine fair value, the company uses other inputs that are observable either directly or indirectly. Assets included in level 2 generally consist of U.S. Government agency securities, municipal bonds, asset-backed securities and certain corporate bonds. The level 2 marketable securities were measured at fair value based on matrix pricing using prices of similar securities with similar inputs such as maturity dates, interest rates and credit ratings. There were no level 3 assets that were valued on a recurring basis as of March 31, 2011. In addition, there were no liabilities valued at fair value on a recurring basis.

## [Table of Contents](#)

Financial assets recorded in the consolidated balance sheet as of March 31, 2011 were classified in their entirety based on the lowest level of input that was significant to each asset's fair value measurement.

### Financial Instruments Measured at Fair Value on a Recurring Basis:

<i>(in millions)</i>	At March 31, 2011			Total
	Level 1	Level 2	Level 3	
Assets at Fair Value:				
Marketable securities:				
U.S. Treasury securities	\$ 5.1	\$ —	\$ —	\$ 5.1
Mutual funds	32.6	—	—	32.6
Corporate bonds	—	0.1	—	0.1
Municipal bonds	—	4.4	—	4.4
Asset-backed securities	—	1.7	—	1.7
U.S. Government agency securities	—	10.7	—	10.7
Total	37.7	16.9	—	54.6
Equity investments	775.4	—	—	775.4
Total Assets at Fair Value	<u>\$ 813.1</u>	<u>\$ 16.9</u>	<u>\$ —</u>	<u>\$ 830.0</u>

At March 31, 2011, equity investments include our investment in BM&FBOVESPA, which has been recorded at fair value using the quoted market price beginning in February 2011. The fair value of our investment in BM&FBOVESPA is \$727.6 million at March 31, 2011. Until February 2011, this investment was recorded at cost due to restrictions on sale of the stock that exceeded a one year time period. Equity investments are included in other assets in the consolidated balance sheets.

There were no transfers of assets between level 1 and level 2 during the first quarter of 2011. Additionally, there were no assets or liabilities valued at fair value on a recurring or non-recurring basis using significant unobservable inputs during the first quarter of 2011.

### 10. Earnings Per Share

Basic earnings per share is computed by dividing net income attributable to CME Group by the weighted average number of shares of all classes of common stock outstanding for each reporting period. Diluted earnings per share reflects the increase in shares using the treasury stock method to reflect the impact of an equivalent number of shares of common stock if stock options were exercised and restricted stock awards were converted into common stock. Outstanding stock options of approximately 694,000 and 609,000 were anti-dilutive for the quarters ended March 31, 2011 and 2010, respectively. There were no anti-dilutive restricted stock awards for the quarters ended March 31, 2011 and 2010.

<i>(in millions, except shares and per share data)</i>	Quarter Ended March 31,	
	2011	2010
Net Income Attributable to CME Group	\$ 456.6	\$ 240.2
Weighted Average Number of Common Shares (in thousands):		
Basic	66,857	66,234
Effect of stock options	137	155
Effect of restricted stock grants	68	39
Diluted	<u>67,062</u>	<u>66,428</u>
Earnings per Common Share Attributable to CME Group:		
Basic	\$ 6.83	\$ 3.63
Diluted	6.81	3.62

**11. Subsequent Events**

The company has evaluated subsequent events through the date the financial statements were issued and has determined that there are no subsequent events that require disclosure except for the following:

In May 2011, the board of directors authorized a share buyback program of up to \$750.0 million of CME Group Class A common stock over a 12 month period.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion is provided as a supplement to, and should be read in conjunction with, the accompanying unaudited consolidated financial statements and notes in this Form 10-Q and our Annual Report on Form 10-K for the year ended December 31, 2010.

References in this discussion and analysis to "we," "us" and "our" are to CME Group and its consolidated subsidiaries, collectively. References to "exchange" are to Chicago Mercantile Exchange Inc. (CME), Board of Trade of the City of Chicago, Inc. (CBOT), and New York Mercantile Exchange, Inc. (NYMEX), collectively.

**RESULTS OF OPERATIONS**

**Financial Highlights**

The following summarizes significant changes in our financial performance for the periods presented.

<i>(dollars in millions, except per share data)</i>	Quarter Ended March 31,		Change
	2011	2010	
Total revenues	\$ 831.6	\$ 693.2	20%
Total expenses	307.5	278.5	10
Operating margin	63%	60%	
Non-operating income (expense)	\$ (12.5)	\$ (15.8)	(21)
Effective tax rate	11%	40%	
Net income attributable to CME Group	\$ 456.6	\$ 240.2	90
Diluted earnings per common share attributable to CME Group	6.81	3.62	88
Cash flows from operating activities	362.1	355.7	2

- Growth in overall trading volume contributed to an increase in clearing and transaction fees revenue in the first quarter of 2011 when compared with the same period of 2010.
- An increase in compensation and benefits expense due to the addition of employees related to the formation of CME Group Index Services LLC (Index Services) in March 2010 as well as bonus expense contributed to higher overall expenses.
- The decline in the effective tax rate was largely attributable to a change in state tax apportionment and a reduction in valuation allowances on other unrealized capital losses previously reserved.
- Cash flows from operations are strongly correlated with trading volume. Average daily volume increased by 19% during the first quarter of 2011 when compared with the same period in 2010. The increase in cash flows from operations was partially offset by a decrease in deferred taxes.

<i>(dollars in millions)</i>	Quarter Ended March 31,		Change
	2011	2010	
Clearing and transaction fees	\$ 691.3	\$ 578.0	20%
Market data and information services	107.0	87.6	22
Access and communication fees	11.5	10.9	5
Other	21.8	16.7	31
<b>Total Revenues</b>	<b>\$ 831.6</b>	<b>\$ 693.2</b>	<b>20</b>

[Table of Contents](#)

**Clearing and Transaction Fees**

The following table summarizes our total contract volume, revenue and average rate per contract. Total contract volume includes contracts that are traded on our exchange and cleared through our clearing house. Contract volume also includes cleared-only CME ClearPort contracts. Volume is measured in round turns, which is considered a completed transaction which involves a purchase and an offsetting sale of a contract. Average rate per contract is determined by dividing total clearing and transaction fee revenues by total contract volume. All amounts exclude our TRAKRS, credit default swaps and interest rate swaps.

	Quarter Ended March 31,		Change
	2011	2010	
Total volume (in millions)	855.2	704.2	21%
Clearing and transaction fees (in millions)	\$691.3	\$578.0	20
Average rate per contract	0.808	0.821	(2)

We estimate the following increases (decreases) in clearing and transaction fees based on change in total volume and change in average rate per contract during the first quarter of 2011 when compared with the same period in 2010.

*(in millions)*

Increase due to change in total volume	\$124.0
Decrease due to change in average rate per contract	(10.7)
Net increase in clearing and transaction fees	\$113.3

Average rate per contract is impacted by our rate structure, which includes volume-based incentives; product mix; trading venue; and the percentage of volume executed by customers who are members compared with non-member customers. Due to the relationship between average rate per contract and volume, the change in revenues attributable to changes in each is only an approximation.

**Contract Volume**

The following table summarizes average daily contract volume.

*(amounts in thousands)*

	Quarter Ended March 31,		Change
	2011	2010	
<b>Product Line Average Daily Volume:</b>			
Interest rate	6,424	5,120	25%
Equity	2,906	2,815	3
Foreign exchange	961	887	8
Agricultural commodity	1,154	785	47
Energy	1,973	1,609	23
Metal	376	328	15
Aggregate average daily volume	13,794	11,544	19
<b>Average Daily Volume by Venue:</b>			
Electronic	11,605	9,562	21
Open outcry	1,467	1,318	11
Privately negotiated	224	190	18
Total exchange-traded volume	13,296	11,070	20
Total CME ClearPort	498	474	5
Aggregate average daily volume	13,794	11,544	19
Electronic Volume as a Percentage of Total Volume	84%	83%	

## [Table of Contents](#)

### *Interest Rate Products*

The following table summarizes average daily volume for our key interest rate products.

<i>(amounts in thousands)</i>	Quarter Ended March 31,		Change
	2011	2010	
Eurodollar futures	2,519	1,996	26%
Eurodollar options	769	674	14
U.S. Treasury futures and options:			
10-Year	1,502	1,167	29
5-Year	747	501	49
Treasury bond	400	346	16
2-Year	347	323	8

The overall increase in interest rate product volume was attributable to changing market expectations about interest rate increases based on a continued zero interest rate policy in the United States as well as overall improvement in the economic environment following the credit crisis. Market expectations regarding interest rate increases have shifted further into the future. This shift in expectations and an increase in volatility in long-term interest rate yields resulted in growth in longer-term Eurodollar contracts and U.S. Treasury contracts. We also believe the increase in U.S. Treasury contract volume is attributable to changing expectations regarding the Federal Reserve's intention to continue to buy additional U.S. Treasury securities to stimulate the economy.

### *Equity Products*

The following table summarizes average daily volume for our key equity futures and options products.

<i>(amounts in thousands)</i>	Quarter Ended March 31,		Change
	2011	2010	
E-mini S&P 500	2,329	2,221	5%
E-mini NASDAQ 100	293	319	(8)

Overall equity products volume remained relatively flat in the first quarter of 2011 when compared with the same period of 2010 as a rise in average daily volume for E-mini S&P 500 contracts was partially offset by a decline in average daily volume for the E-mini NASDAQ 100. We believe the increase in average daily volume for E-mini S&P 500 contracts was attributable to short periods of high volatility during the first quarter of 2011 caused by events in Asia and the Middle East. In general, equity products that hedge market risks different from those of the E-mini S&P 500, our most liquid equity product, do not tend to benefit from macro-level events or increased volatility to the same extent.

### *Foreign Exchange Products*

The following table summarizes average daily volume for our key foreign exchange futures and options products.

<i>(amounts in thousands)</i>	Quarter Ended March 31,		Change
	2011	2010	
Euro	367	339	8%
Japanese yen	150	126	19
British pound	133	135	(2)
Australian dollar	109	103	6
Canadian dollar	85	85	—

In the first quarter of 2011 when compared with the same period of 2010, growth in overall foreign exchange product volume was attributable to increases in volume for the Euro and Japanese yen contracts. The increase in average daily volume for Euro contracts was attributable to volatility following the European credit crisis, which peaked in the second quarter of 2010. We believe the increase in Japanese yen trading volume was attributable to increased volatility

## [Table of Contents](#)

resulting from uncertainty surrounding the Japanese economy following the earthquake and tsunami. In addition, our cross-selling efforts to market participants in other asset classes as well as increased global sales presence contributed to growth in volume.

### *Agricultural Commodities Products*

The following table summarizes average daily volume for our key agricultural commodity futures and options products.

<i>(amounts in thousands)</i>	Quarter Ended March 31,		Change
	2011	2010	
Corn	453	269	69%
Soybean	251	181	39
Wheat	125	88	42

We believe that increased volatility associated with changes in global supply attributable to global weather events contributed to the increase in average daily volume for our agricultural commodity products in the first quarter of 2011 when compared with the same period of 2010. We also believe the increase in volume resulted from increased demand for feedgrains caused by increased demand for meat in emerging markets.

### *Energy Products*

The following table summarizes average daily volume for our key energy products.

<i>(amounts in thousands)</i>	Quarter Ended March 31,		Change
	2011	2010	
Crude oil	1,064	789	35%
Natural gas	571	485	18
Refined products	267	234	14
Power	68	97	(30)

In the first quarter of 2011 when compared with the same period of 2010, we believe the increase in overall energy volume was attributable to increased price volatility within the energy market. We believe that the increase in crude oil volume was due to increased volatility caused by changes in global supply and demand resulting from political unrest in the Middle East. We also believe that increased volatility caused by weather-related events lead to an increase in natural gas contract volume.

### *Metal Products*

The following table summarizes average daily volume for our key metal products.

<i>(amounts in thousands)</i>	Quarter Ended March 31,		Change
	2011	2010	
Gold	233	232	1%
Silver	86	47	82

The overall increase in metal products volume is attributable to the increased investment in precious metals as an asset class. We believe that there has been a shift in investment from gold to silver due to increases in the price of gold.

### *Average Rate per Contract*

The average rate per contract decreased in the first quarter of 2011 when compared with the same period in 2010 due to an increase in member trading volume, which increased faster than non-member trading in the first quarter of 2011. In general, members receive lower rates compared with non-members. In addition, the average rate per contract decreased due to incremental volume in energy and interest rate products which triggered higher-tiered discount levels.

## [Table of Contents](#)

### *Concentration of Revenue*

We bill a substantial portion of our clearing and transaction fees to our clearing firms. The majority of clearing and transaction fees received from clearing firms represent charges for trades executed and cleared on behalf of their customers. Two firms each represented 12% of our clearing and transaction fees revenue in the first quarter of 2011. Should a clearing firm withdraw, we believe that the customer portion of the firm's trading activity would likely transfer to another clearing firm of the exchange. Therefore, we do not believe we are exposed to significant risk from the loss of revenue received from a particular clearing firm.

### **Other Sources of Revenue**

The market data and licensing revenue from Index Services contributed to an increase in market data and information services revenue in the first quarter of 2011 when compared with the same period in 2010.

The two largest resellers of our market data represented approximately 40% of our market data and information services revenue in the first quarter of 2011. Despite this concentration, we consider exposure to significant risk of revenue loss to be minimal. In the event that one of these vendors no longer subscribes to our market data, we believe the majority of that vendor's customers would likely subscribe to our market data through another reseller. Additionally, several of our largest institutional customers that utilize services from our two largest resellers report usage and remit payment of their fees directly to us.

In the first quarter of 2011, other revenues increased when compared with the same period of 2010 due to \$3.3 million of revenues generated from our agreement with BM&FBOVESPA S.A. (BM&FBOVESPA) to develop a new multi-asset class electronic trading platform and \$1.5 million in incremental processing services revenue generated from various strategic relationships.

### **Operating Expenses**

<i>(dollars in millions)</i>	<b>Quarter Ended March 31,</b>		<b>Change</b>
	<b>2011</b>	<b>2010</b>	
Compensation and benefits	\$ 122.3	\$ 98.8	24%
Communications	9.9	10.1	(1)
Technology support services	12.0	12.2	(1)
Professional fees and outside services	30.7	31.2	(2)
Amortization of purchased intangibles	33.2	30.8	8
Depreciation and amortization	31.0	32.2	(4)
Occupancy and building operations	19.4	20.5	(5)
Licensing and other fee agreements	23.5	21.1	11
Other	25.5	21.6	18
<b>Total Expenses</b>	<b>\$ 307.5</b>	<b>\$ 278.5</b>	<b>10</b>

## [Table of Contents](#)

Operating expenses increased by \$29.0 million in the first quarter of 2011 when compared with the same period in 2010. The following table shows the estimated impact of key factors resulting in the increase in operating expenses:

<i>(dollars in millions)</i>	<b>Quarter Ended March 31, 2011</b>	
	<b>Amount of Change</b>	<b>Change as a Percentage of Total Expenses</b>
Salaries, benefits and employer taxes	\$ 14.8	5
Bonus expense	5.7	2
Litigation settlements and associated legal fees	5.7	2
Broker rebates	2.8	1
Stock based compensation	2.6	1
Amortization of purchased intangibles	2.4	1
Professional fees related to Index Services	(9.1)	(3)
Depreciation expense on server hardware	(2.5)	(1)
Other expenses, net	6.6	2
<b>Total</b>	<b>\$ 29.0</b>	<b>10%</b>

Salary increases and rising healthcare costs contributed to the increase in salaries, benefits and employer taxes. An increase in average headcount primarily due to the acquisition of Index Services in March 2010 also contributed to an increase in expense.

The increase in our bonus expense in the first quarter of 2011 was due to improved performance relative to our 2011 cash earnings target compared with the same period of 2010 relative to our 2010 cash earnings target.

Expenses increased due to an increase in litigation settlements and associated legal fees.

Stock based compensation increased in the first quarter of 2011 due to the expense impact related to the September 2010 grant.

Amortization of purchased intangibles increased in the first quarter of 2011 due to the amortization of intangible assets created through the formation of Index Services in March 2010 and due to our acquisition of Elysian Systems Ltd.

The increase in broker rebates on CME ClearPort contracts is attributable to growth in contract volumes.

The overall increase in expense was partially offset by a decrease in professional fees relating to the formation and integration of Index Services which occurred in 2010, as well as a decrease in depreciation due to increased use of more efficient technology hardware.

### **Non-Operating Income (Expense)**

<i>(dollars in millions)</i>	<b>Quarter Ended March 31,</b>		<b>Change</b>
	<b>2011</b>	<b>2010</b>	
Investment income	\$ 18.8	\$ 11.1	69%
Gains (losses) on derivative investments	(0.1)	6.0	(102)
Interest and other borrowing costs	(30.1)	(31.4)	(4)
Equity in net losses of unconsolidated subsidiaries	(1.1)	(1.5)	(26)
<b>Total Non-Operating</b>	<b>\$ (12.5)</b>	<b>\$ (15.8)</b>	<b>(21)</b>

The increase in investment income during the first quarter of 2011 when compared with the same period in 2010 was primarily due to an increase in dividend income from our investments in BM&FBOVESPA and IMAREX ASA. Total dividend income was \$16.7 million in the first quarter of 2011 compared with \$9.9 million for the same period in 2010.

In March 2010, we recognized a \$6.0 million gain on derivative investments as a result of a settlement from the Lehman Brothers Holdings Inc. (Lehman) bankruptcy proceedings. The settlement related to an unsecured claim against Lehman as counterparty to an over-the-counter put option contract we purchased to hedge our risk of changes in the fair value of BM&FBOVESPA stock resulting from foreign currency exchange rate fluctuations between the U.S. dollar and the Brazilian real.

## [Table of Contents](#)

In the first quarter of 2011 when compared with the same period in 2010, interest expense decreased due to the repayment of the \$420.5 million term loan in January 2011. The decrease in interest expense was partially offset by the issuance of \$612.5 million of 4.40% fixed rates notes due 2018 in March 2010.

	Quarter Ended March 31,		Change
	2011	2010	
Weighted average borrowings outstanding (in millions)	\$2,288.2	\$2,545.8	(257.6)
Weighted average effective yield	5.03%	4.73%	0.30%
Total cost of borrowings	5.42	5.00	0.42

Total cost of borrowing includes interest, commitment fees, discount accretion and debt issuance costs.

### Income Tax Provision

The effective tax rate decreased to 10.7% in the first quarter of 2011 from 39.8% in the first quarter of 2010. The decrease in our effective rate was primarily attributable to a change in state tax apportionment. This change resulted in a reduction in our income tax provision by \$118.1 million due largely to a revaluation of our existing deferred tax liabilities. Additionally, in the first quarter of 2011, we began marking-to-market our investment in BM&FBOVESPA which resulted in a \$48.8 million reduction in valuation allowances on other unrealized capital losses previously reserved. In the first quarter of 2010, we reduced the liability for uncertain tax positions by \$6.4 million, resulting in an increase in the effective tax rate for the first quarter of 2011, when compared with the same period in 2010.

### Liquidity and Capital Resources

**Sources and Uses of Cash.** Net cash provided by operating activities was \$362.1 million for the first quarter of 2011 compared with \$355.7 million for the same period in 2010. The increase in net cash provided by operating activities was due primarily to higher trading volumes and increased profitability, partially offset by a decrease in deferred tax liabilities. In the first quarter of 2011, net cash provided by operating activities was \$95.0 million lower than net income. This decrease was primarily the result of a decrease in deferred tax liabilities of \$152.1 million due to the revaluation of our existing deferred tax liabilities and a reduction in deferred tax valuation allowances. Also contributing to the overall decrease was an increase in accounts receivable of \$96.4 million. Accounts receivable in any period result primarily from the clearing and transaction fees billed in the last month of the reporting period. The decrease was partially offset by an increase in income tax payable of \$157.2 million. The increase in income tax payable was due to the timing of the estimated quarterly federal income tax payment, which was made in April 2011.

Cash used in investing activities was \$41.6 million in the first quarter of 2011 compared with cash used investing activities of \$19.8 million in the first quarter of 2010. The increase in cash used was largely attributable to an increase in purchases of property in the first quarter of 2011, when compared with the same period in 2010.

Cash used in financing activities was \$511.0 million in the first quarter of 2011 compared with \$152.3 million for the same period in 2010. The increase was primarily attributable to the repayment of the \$420.5 million term loan on January 11, 2011. The increase was partially offset by share repurchases of \$281.8 million in the first quarter of 2010.

**Debt Instruments.** The following table summarizes our debt outstanding as of March 31, 2011:

(in millions)	Par Value
Fixed rate notes due August 2013, interest equal to 5.40%	\$ 750.0
Fixed rate notes due February 2014, interest equal to 5.75%	750.0
Fixed rate notes due March 2018, interest equal to 4.40% <sup>(1)</sup>	612.5

- (1) In March 2010, we completed an unregistered offering of fixed rate notes due 2018. Net proceeds from the offering were used to fund a distribution to Dow Jones in conjunction with our investment in Index Services. In February 2010, we entered into a forward-starting interest rate swap agreement that modified the interest obligation associated with these notes so that the interest payable on the notes effectively became fixed at a rate of 4.46% beginning with the interest accrued after March 18, 2010.

## [Table of Contents](#)

Effective January 11, 2011, we entered into a new \$1.0 billion multi-currency revolving senior credit facility with various financial institutions. The proceeds from the revolving senior credit facility can be used for general corporate purposes, which includes providing liquidity for our clearing house. As long as we are not in default under the new senior credit facility, we have the option to increase the facility to \$1.8 billion with the consent of the agent and lenders providing the additional funds. The new senior credit facility matures in January 2014 and is voluntarily prepayable from time to time without premium or penalty. Under our new credit facility, we are required to remain in compliance with a consolidated net worth test, as defined as our consolidated shareholders' equity as of September 30, 2010, giving effect to share repurchases made and special dividends paid during the term of the agreement (and in no event greater than \$2.0 billion in aggregate), multiplied by 0.65.

We maintain a 364-day fully secured, committed line of credit with a consortium of domestic and international banks to be used in certain situations by our clearing house. We may use the proceeds to provide temporary liquidity in the unlikely event of a clearing firm default, in the event of a liquidity constraint or default by a depository (custodian for our collateral), or in the event of a temporary disruption with the domestic payments system that would delay payment of settlement variation between us and our clearing firms. Clearing firm guaranty fund contributions received in the form of U.S. Treasury securities, Government agency securities or money market mutual fund as well as the performance bond assets of a defaulting firm can be used to collateralize the facility. The line of credit provides for borrowings of up to \$1.0 billion. At March 31, 2011, guaranty fund collateral available was \$2.9 billion. We have the option to request an increase in the line from \$1.0 billion to \$2.0 billion. In addition to the 364-day fully secured, committed line of credit, we also have the option to use the new \$1.0 billion multi-currency revolving senior credit facility to provide liquidity for our clearing house in the unlikely event of default.

In addition, our 364-day fully secured, committed revolving line of credit contains a requirement that CME remain in compliance with a consolidated tangible net worth test, defined as CME consolidated shareholder's equity less intangible assets (as defined in the agreement), of not less than \$125.0 million. In the event that CME elects to increase the facility, the minimum consolidated tangible net worth test would increase ratably up to \$187.5 million.

The indentures governing our floating and fixed rate notes, our 364-day fully secured, committed revolving line of credit for \$1.0 billion and our \$1.0 billion multi-currency revolving senior credit facility do not contain specific covenants that restrict the ability to pay dividends. These documents, however, do contain other customary financial and operating covenants that place restrictions on the operations of the company, which could indirectly affect the ability to pay dividends.

At March 31, 2011, we have excess borrowing capacity for general corporate purposes of approximately \$1.0 billion.

As of March 31, 2011, we were in compliance with the various covenant requirements of all our debt facilities.

CME Group, as a holding company, has no operations of its own. Instead, it relies on dividends declared and paid to it by its subsidiaries in order to provide a portion of the funds which it uses to pay dividends to its shareholders.

To satisfy our performance bond obligation with Singapore Exchange Limited, we may pledge CME-owned U.S. Treasury securities in lieu of, or in combination with, irrevocable letters of credit. At March 31, 2011, the letters of credit totaled \$117.0 million. CME also guarantees a \$15.0 million standby letter of credit for GFX. The beneficiary of this letter of credit is the clearing firm that is used by GFX to execute and maintain its futures position. The letter of credit would be utilized in the event that GFX defaults in meeting performance bond requirements to its clearing firm.

The following table summarizes our credit ratings as of March 31, 2011:

<b>Rating Agency</b>	<b>Short-Term Debt Rating</b>	<b>Long-Term Debt Rating</b>	<b>Outlook</b>
Standard & Poor's	A1+	AA	CreditWatch Negative
Moody's Investors Service	P1	Aa3	Stable

On March 3, 2011, Standard & Poor's Ratings Services placed its ratings for CME Group Inc. on CreditWatch Negative.

Given our ability to pay down debt levels and refinance existing debt facilities if necessary, we expect to maintain an investment grade rating. If our ratings are downgraded due to a change in control which results in a downgrade below investment grade, we are required to make an offer to repurchase our fixed rate notes at a price equal to 101% of the principal amount, plus accrued and unpaid interest.

## [Table of Contents](#)

**Liquidity and Cash Management.** Cash and cash equivalents totaled \$664.7million at March 31, 2011 and \$855.2 million at December 31, 2010. The balance retained in cash and cash equivalents is a function of anticipated or possible short-term cash needs, prevailing interest rates, our investment policy and alternative investment choices. A majority of our cash and cash equivalents balance is invested in money market mutual funds that invest only in U.S. Treasury securities or U.S. government agency securities. Our exposure to risk is minimal given the nature of the investments.

Net current deferred tax assets of \$21.6 million and \$18.3 million are included in other current assets at March 31, 2011 and December 31, 2010, respectively. Total net current deferred tax assets include unrealized losses, stock-based compensation and accrued expenses.

Net long-term deferred tax liabilities were \$7.8 billion at March 31, 2011 and December 31, 2010, respectively. Net deferred tax liabilities are principally the result of purchase accounting for intangible assets in our various mergers including CBOT Holdings and NYMEX Holdings.

Net long-term deferred tax assets include a \$19.3 million deferred tax asset for foreign net operating losses related to Swapstream. Our assessment at March 31, 2011 was that we did not currently meet the more-likely-than-not threshold that would allow us to realize the value of acquired and accumulated foreign net operating losses in the future. As a result, the \$19.3 million deferred tax assets arising from these net operating losses have been fully reserved. Valuation allowances of \$1.0 million have also been provided for additional unrealized capital losses on various other investments.

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

We are subject to various market risks, including those caused by changes in interest rates, credit, foreign currency exchange rates and equity prices. There have not been material changes in our exposure to market risk since December 31, 2010. Refer to Item 7A. of CME Group's Annual Report on Form 10-K for the year ended December 31, 2010 for additional information.

### **Item 4. Controls and Procedures**

(a) *Disclosure Controls and Procedures.* Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, our disclosure controls and procedures are effective.

b) *Changes in Internal Control Over Financial Reporting.* As required by Rule 13a-15(d) under the Exchange Act, the company's management, including the company's Chief Executive Officer and Chief Financial Officer, have evaluated the company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) to determine whether any changes occurred during the quarter covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting. There were no changes in the company's internal control over financial reporting during the period covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

## **PART II. OTHER INFORMATION**

### **Item 1. Legal Proceedings**

There have been no material updates to the Legal Proceedings as set forth in Item 1. of our Annual Report on Form 10-K, filed with the SEC on February 28, 2011.

### **Item 1A. Risk Factors**

There have been no material updates to the Risk Factors as set forth in Item 1A. of our Annual Report on Form 10-K, filed with the SEC on February 28, 2011. In addition to the other information contained in this Quarterly Report on Form

[Table of Contents](#)

10-Q, you should carefully consider the factors discussed in our Annual Report on Form 10-K, which are the risks that we believe are material at this time. These risks could materially and adversely affect our business, financial condition and results of operations. These risks and uncertainties are not the only ones facing us. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also adversely affect our business in the future.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds***(c) Issuer Purchases of Equity Securities*

<b>Period</b>	<b>(a) Total Number of Class A Shares Purchased (1)</b>	<b>(b) Average Price Paid Per Share</b>	<b>(c) Total Number of Class A Shares Purchased as Part of Publicly Announced Plans or Programs</b>	<b>(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (2)</b>
January 1 to January 31	—	\$ —	—	343,235
February 1 to February 28	—	\$ —	—	343,235
March 1 to March 31	525	\$ 285.90	—	343,235
Total	525	\$ 285.90	—	

- (1) Shares purchased consist of an aggregate of 525 shares of Class A common stock surrendered in the first quarter of 2011 to satisfy employees' tax obligations upon the vesting of restricted stock.
- (2) Under the terms of the share buyback program announced on February 12, 2010, the company was authorized to purchase shares of Class A common stock up to 2.35 million shares. The authorization of the buyback was approved in connection with our agreement to issue additional Class A common shares to BM&FBOVESPA to increase its aggregate share ownership in the company to 5% and serves to offset the dilution of the shares issued to BM&FBOVESPA. At the end of quarter, 343,235 shares remained yet to be purchased under this authorization. On May 9, 2011, the board of directors authorized a new share buyback program of up to \$750.0 million of Class A common stock over a 12-month period. In connection with this new authorization, the authorization to purchase the remaining 343,235 shares was terminated.

## CERTIFICATIONS

I, Craig S. Donohue, certify that:

1. I have reviewed this report on Form 10-Q of CME Group Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification of CEO and CFO Pursuant to  
18 U.S.C. Section 1350,  
as Adopted Pursuant to  
Section 906 of the Sarbanes-Oxley Act of 2002**

In connection with the Quarterly Report on Form 10-Q of CME Group Inc. (the "Company") for the quarter ended March 31, 2011 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Craig S. Donohue, as Chief Executive Officer of the Company, and James E. Parisi, as Chief Financial Officer of the Company, each hereby certifies, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that, to the best of his knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
